## Letter of introduction

Mr Albert Fosso is studying "Environment and natural resources" at the University of Applied Sciences of Waedenswil, Switzerland, with the specialization "plant cultivation". Mr. Fosso shows much effort in his studies, his preferred matter being the cultivation of vegetables.

In his diploma thesis he is discussing the production system und the cultivation techniques of special varieties of eggplants and ginger in biological production. In particular Mr Fosso considers the production costs concerning the planting conditions in Switzerland.

As a teacher and supervisor of his diploma thesis I want to confirm that Mr Fosso does his studies well-founded and engaged. Although German isn't his native tongue he is decided to finish his studies at the University of Applied Sciences in Waedenswil. This shows his willingness to take up new challenges.

We wish Mr Fosso all the best for his professional and private future

University of Applied Sciences Wädenswil
