

Report on the Course for Basic Horticulture for the students from Karamachan (SAN Community – West Caprivi Region, Namibia)

2013-04-29

Students:

Kativa Moyo

Thimotheus Moyo

Stephanus Matjetje

Sandre Ametsi

The course was successful and the students passed their theoretical tests. One student will have to spend more time on the practical applications to be able to round him off.

Subjects such as Crop Types, Crop Rotation, Planting Calendar, Seasonal Crops, Veggie Tunnel Installation, Drip Line Installation and basic Pest Control were covered by this course.

The course spanned over 2 weeks after which the students returned home. IRDNC will provide 2 Veggie Tunnels as part of a Pilot Project for these students to hone their skills on.

NHT wishes them well and all the best for their new venture.
